Silicone grease

三文堂鑽石530

三文堂鑽石530是一支活塞上墨鋼筆，產品發想是經由互聯網上與眾多鋼筆愛好者相互溝通討論，依其期望而產生。

- 採用活塞上墨方式
- 所有零組件均可重複拆裝，方便進行保養維修
- 最重要的，一支性價比高的鋼筆

如果您請教一些現今鋼筆愛用者他們會告訴您鋼筆所帶給他們生活上的樂趣。重拾紙筆書寫，練字認字，拆裝鋼筆進行保養維修，體驗製筆工藝的進展等。

三文堂秉持 明亮、和善、進取 的三大品牌精神，倡導 真實價值 (True Value) 的人生理念，希望能藉由鋼筆的書寫使用重新喚起人們享受簡單優雅的生活樂趣。

The TWSBI Diamond 530

The idea behind the TWSBI Diamond 530 was to go back to basics and capture the simplicity and elegance of traditional writing instruments. In recent years, the development and modernization of writing instruments has resulted in traditional writing instruments, such as fountain pens, falling into obscurity. It was our goal to bring the past back to life by creating a traditional fountain pen that even modern day society can appreciate.

We discovered a tight-knit group of fountain pen lovers on the Internet and asked them why they loved fountain pens so much. They answered that the fountain pen is a great

traditional writing instrument that is able to transport people into the more relaxing lifestyle of the past. As a result, the pen can teach its user to slow down, appreciate the little things, and enjoy life. Even the simple act of disassembling and reassembling the pen is an experience that can break its owner out of the monotonous cycle of fast-paced modern day life.

It was with this in mind that we assembled a team and designed a pen according to their wishes. The result was the TWSBI Diamond 530, a classic fountain pen with a piston ink-filling system. By fusing the traditional mechanisms of the fountain pen with a modern

industrial design, we have created an eye-catching fountain pen that is simultaneously appreciative of the past and relevant in the present. Most importantly, we wanted to be able to bring this quality writing instrument to our customers at a very favorable retail price, by means of the shortest possible distribution channel.

The Diamond 530 comes with a benchmark ink-filling mechanism and has all detachable parts. We felt that it was important to allow the user to disassemble and reassemble the pen and completely experience the traditional aspects of owning and using a fountain pen. The Diamond 530 is a pen with a purpose. We hope that it can teach its users, however

young or old, to understand the value of enjoying life. We at TWSBI approach each project with the end user in mind. In this particular case, we had the following goals:

- For the pen to be functional, as well as aesthetically pleasing
- For the pen to help the user express him- or herself
- For the pen to bring people together
- For the pen to be affordable
- For the pen to teach the user how to enjoy a slower-paced lifestyle

With the TWSBI Diamond 530, we believe that the project was a success.
